EDUCATION

Ph.D. in Aerospace Engineering, University of Illinois at Urbana-Champaign	Jan 2021 - Dec 2025
B.S. in Aerospace Engineering, University of Illinois at Urbana-Champaign	Aug 2017 - Dec 2020

WORK EXPERIENCE

NASA Jet Propulsion Laboratory (JPL)	Advisors: Dr. Steven Chesley, Dr. Davide Farnocchia
Visiting Technologist / NSTGRO Fellow	May 2023 - Aug 2023, Mar 2024 - Jun 2024

- Validated an efficient solar system propagator with sub-1 km position accuracy over 250 years compared to JPL's internal small body software.
- Developed an orbit determination submodule alongside the propagator that has sub- 1σ agreement with JPL small-body orbit solutions.
- Presented a publicly available Python package, GRSS, to allow the scientific community to accurately propagate and determine the orbits of solar system bodies.
- Implemented ability to compute locations of gravitational keyholes, which are predictors of future asteroid impacts with Earth.

NASA Goddard Space Flight Center (GSFC)	Advisors: Kenneth Getzandanner, Andrew Liounis
OSIRIS-REx/OSIRIS-APEX CelNav Intern	Jun 2022 - Aug 2022

- Developed simulations to assess performance of Celestial Navigation (CelNav) using onboard optical instruments during the OSIRIS-APEX cruise phase.
- Simulated more than 8,000 solar system bodies to obtain optimal observable clusters for the spacecraft.
- Performed covariance analysis using JPL's MONTE software to study the spacecraft's state uncertainty on its way to asteroid (99942) Apophis.

RESEARCH EXPERIENCE

Astrodynamics and Planetary Exploration Group	Advisor: Dr. Siegfried Eggl
Gauss-Radau Small-body Simulator (GRSS)	Nov 2022 - present

- Released an open-source Python library with a C++ binding for use by the planetary defense community.
- Developed a high-accuracy propagator for solar system bodies using Gauss-Radau quadrature.
- Built an orbit determination code for estimating small body orbits using optical and radar observations.

Double Asteroid Redirection Test (DART) Mission	May 2020 - Feb 2024
-------------------------------------------------	---------------------

- Analyzed high-fidelity kinetic impactor simulation results from NASA's Jet Propulsion Laboratory (JPL) for impacts in the (65803) Didymos binary asteroid system.
- Implemented a novel method to impart momentum changes in the Didymos system after the DART impact.
- Generated updated B-plane maps to conclude that the Didymos system will not collide with the Earth after the DART impact.
- Wrote MATLAB and Python parameter estimation packages to assess measurability of the heliocentric momentum enhancement from the DART impact.

Aerospace Mission Analysis Laboratory

Advisor: Dr. Zachary Putnam

Venus Aerogravity Assist Performance Assessment

Aug 2022 - Jan 2023

- Analyzed Venus aerogravity assist missions to significantly reduce transit times to the outer solar system.
- Assessed the performance of blunt-body vehicles and waveriders using a MATLAB pipeline for varying trajectories and vehicle configurations.

TEACHING EXPERIENCE

University of Illinois at Urbana-Champaign

Instructor: Dr. Siegfried Eggel

Teaching Assistant for AE 352: Aerospace Dynamical Systems

Aug 2021 - Dec 2021

- Focused on developing and teaching the curriculum's core dynamics course with aerospace applications.
- Syllabus covered Newtonian, Lagrangian, and Hamiltonian mechanics for rigid body motion.
- Guided 16 student teams with Project Clear Constellation, focusing on methods to remove orbital debris.

SKILLS

Programming Languages Python, C/C++, Fortran, MATLAB, R/RStudio

Software Tools \LaTeX , Git

Prepackaged Tools SPICE, MONTE, GMAT, FreeFlyer

Operating Systems Linux, MacOS, Windows

Languages English, Gujarati, Hindi, French

AWARDS AND AFFILIATIONS

NASA Space Technology Graduate Research Opportunities Fellow

Aug 2022 - present

NSTGRO fellowship from NASA Space Technology Mission Directorate

ARCS Foundation Scholar Award

Aug 2023 - present

Achievement Rewards for College Scientists (ARCS) Foundation Illinois Chapter

Best Visual Poster Award

Feb 2024

UIUC Aerospace Engineering Department

Double Asteroid Redirection Test (DART) Investigation Team Member

Dec 2020 - Nov 2023

NASA/Johns Hopkins University Applied Physics Laboratory (JHUAPL)

John C. Mather Nobel Scholar

Jul 2022 - Jun 2023

National Space Grant Foundation

AIAA Award for Aerospace Excellence for DART Investigation Team

May 2023

American Institute of Aeronautics and Astronautics (AIAA)

Fellowship for Outstanding Academic and Research Achievement

Apr 2023

UIUC Aerospace Engineering Department

President's Award

Aug 2017 - Dec 2020

University of Illinois at Urbana-Champaign
