EDUCATION

Ph.D. in Aerospace Engineering, University of Illinois at Urbana-Champaign — Jan 2021 - present
B.S. in Aerospace Engineering, University of Illinois at Urbana-Champaign — Aug 2017 - Dec 2020

WORK EXPERIENCE

NASA Jet Propulsion Laboratory   Advisors: Steven Chesley, Davide Farnocchia
NSTGRO Visiting Technologist   May 2023 - Aug 2023

– Validated an efficient solar system propagator with sub-1 km position accuracy over 250 years compared to JPL's internal small body software.
– Developed an orbit determination submodule alongside the propagator that has sub-1σ agreement with JPL small-body orbit solutions.
– Presented a publicly available Python package, GRSS, to allow the scientific community to accurately propagate and determine the orbits of solar system bodies.

NASA Goddard Space Flight Center   Advisors: Kenneth Getzandanner, Andrew Liounis
OSIRIS-REx/OSIRIS-APEX Celestial Navigation Intern   Jun 2022 - Aug 2022

– Developed simulations to assess performance of celestial navigation using onboard optical instruments during the OSIRIS-APEX cruise phase.
– Simulated more than 8,000 solar system bodies to obtain optimal observable clusters for the spacecraft.
– Performed covariance analysis using NASA's MONTE software to study the spacecraft's state uncertainty on its way to asteroid (99942) Apophis.

RESEARCH EXPERIENCE

Astrodynamics and Planetary Exploration Research Group   Advisor: Dr. Siegfried Eggl
Double Asteroid Redirection Test (DART) Mission   May 2020 - present

– Analyzed high-fidelity kinetic impactor simulation results from NASA's Jet Propulsion Laboratory (JPL) for impacts in the (65803) Didymos binary asteroid system.
– Implemented a novel method to impart momentum changes in the Didymos system after the DART impact.
– Produced a post-deflection impact risk assessment for Didymos using parallelized Monte Carlo simulations.
– Generated updated B-plane maps to conclude that the Didymos system will not collide with the Earth after the DART impact.
– Wrote MATLAB and Python parameter estimation packages to assess measurability of the heliocentric momentum enhancement from the DART impact.

Gauss-Radau Small-body Simulator (GRSS)   Nov 2022 - present

– Released an open-source Python library with a C++ binding for use by the planetary defense community.
– Developed a high-accuracy propagator for solar system bodies using Gauss-Radau quadrature.
– Built an orbit determination code for estimating small body orbits using optical and radar observations.

Aerospace Mission Analysis Laboratory   Advisor: Dr. Zachary Putnam

Venus Aerogravity Assist Performance Assessment   Aug 2022 - Jan 2023

– Analyzed Venus aerogravity assist missions to significantly reduce transit times to the outer solar system.
– Assessed the performance of blunt-body vehicles and waveriders using a MATLAB pipeline for varying trajectories and vehicle configurations.

TEACHING EXPERIENCE

University of Illinois at Urbana-Champaign   Instructor: Dr. Siegfried Eggl

Teaching Assistant for AE 352: Aerospace Dynamical Systems   Aug 2021 - Dec 2021

– Focused on developing and teaching the curriculum's core dynamics course with aerospace applications.
– Syllabus emphasized on covering Newtonian, Lagrangian, and Hamiltonian mechanics to represent particle motion.
– Assisted 16 student teams with Project Clear Constellation, which called for novel methods to remove orbital debris.

SKILLS

Programming Languages	Python, C/C++, MATLAB, Fortran
Software Tools	LaTeX, Git
Prepackaged Tools	MONTE, GMAT, FreeFlyer
Operating Systems	Linux, MacOS, Windows
Languages	English, Gujarati, Hindi, French

AWARDS AND AFFILIATIONS

NASA Space Technology Graduate Research Opportunities Fellow   Aug 2022 - present

NSTGRO award from NASA Space Technology Mission Directorate (STMD)

Achievement Rewards for College Scientists (ARCS) Scholar   Aug 2023 - present

ARCS Foundation Illinois Chapter

Double Asteroid Redirection Test (DART) Investigation Team Member   Dec 2020 - Nov 2023

NASA/Johns Hopkins University Applied Physics Laboratory (APL)

John C. Mather Nobel Scholar   Jul 2022 - Jun 2023

National Space Grant Foundation

Fellowship for Outstanding Academic and Research Achievement   Apr 2023

Aerospace Engineering Department at the University of Illinois at Urbana-Champaign

President's Award   Aug 2017 - Dec 2020

University of Illinois at Urbana-Champaign

Hans von Muldau Team Award for Best Team Project   October 2019

70th International Astronautical Congress (IAC), Washington D.C.

Dean's List   Spring 2019, Spring 2020

University of Illinois at Urbana-Champaign
